TriLipo[®] with DMA Technology

For Fat Reduction,
Body Sculpting and
Skin Tightening

TriLipo® - Triple Action Fat Reduction

- Focused fat reduction
- Long term circumferential decrease
- Cellulite improvement
- Skin tightening and firming
- Facial contouring
- Wrinkle reduction
- Lifting, toning and firming of muscles
- Detoxification and improved drainage
- Enhanced blood circulation and oxygenation

TriLipo technology is an advanced solution for non-invasive facial and body contouring. The treatment combines TriLipo Radiofrequency technology with TriLipo Dynamic Muscle Activation (DMA) technology for optimal fat reduction and skin tightening results.

The treatment is a quick and painless "walk-in walk-out" solution. With no downtime, patients immediately return to their daily routine. The safety and efficacy of the treatment has been proven in clinical trials and treatment is effective on all skin types. Best of all, results are visible after the very first treatment. For long-term enhanced results it is recommended to undergo a series of treatments.

TriLipo technology is housed within the Lipofirm Pro system. The system is compact and mobile with an easy to use application. The Lipofirm Pro includes 3 applicators - small, medium and large to treat all body areas - from large surfaces to small and delicate areas, and no disposables are required.

TriLipo® Technology - 2 Technologies in a Single Applicator

TriLipo technology uniquely combines two effective technologies-TriLipo Radiofrequency (RF) and TriLipo Dynamic Muscle Activation (DMA). Working simultaneously using a single applicator, they create a synergistic effect that delivers non-invasive fat removal and lymphatic drainage, as well as skin tightening.

TriLipo technology works concurrently on the dermis, hypodermis (fat) and muscle layers to deliver superior fat reduction. The combined effect of TriLipo RF and TriLipo DMA causes deep and homogenous heating of both the dermal and fat layers. TriLipo RF energy heats the subcutaneous fat tissue layer stimulating the release of liquid fat from the cells. This thermal effect accelerates natural fat metabolism.

Fat removal is accelerated by simultaneously applying internal and external pressure on the fat layer. Internally, TriLipo DMA causes the muscles to contract, pushing the fat cells up. Externally, fat cells are pushed down by pressure from the applicator. The resulting "squeeze" effect causes the fat to drain via the DMA patented lymphatic drainage mechanism. The combined TriLipo RF and DMA effect accelerates blood circulation, optimizing tissue oxygenation and detoxification.

Focused TriLipo RF energy causes a contraction of the collagen fibers leading to an immediate tightening effect. Simultaneously, an acceleration of the metabolism of the fibroblast regenerates collagen yielding long-term skin tightening results.

"I find Pollogen's TriLipo non-invasive body shaping systems effective for circumference reduction, removing localized fat deposits and reducing cellulite. My patients are very pleased with the immediate and long-lasting results and are grateful that the treatments are so quick and pleasant."

Michele Pelletier, M.D., Toulon, France

Lipofirm Pro™ Specifications

Applicator specifications	
	TriLipo applicators
Lipofirm Pro output power RF	50 Watts
Mode of Operation	TriLipo
Output frequency RF	1MHz
Output power control RF	Pulse width modulation (PWM)
TriLipo DMA pulse duration	20-400 µs
TriLipo DMA pulse frequency	0.78,1.56, 3.12, 6.25; 12.5; (Hz)
TriLipo DMA pulse amplitude	0 – 300 mA
Programs	RF;TLP0;PULSE
System specifications	
Input voltage	100-240 Volt, 50-60 Hz, max 2.2A
Weight	~22 Kgs
Dimensions	L57 x W49 x H127 cm

ADVANCED ESTHETICS SOLUTIONS

ADVANCED ESTHETICS SOLUTIONS was born from a passion and true dedication of providing effective treatments for the medical, cosmetic and beauty industry with realistic and affordable opportunities for results-driven treatments. Our advanced portfolio of machines include Laser, IPL, Radio Frequency and Ultrasound.

Based in Cardiff, South Wales, the success and strength of ADVANCED ESTHETICS SOLUTIONS is derived from being at the forefront of cutting-edge technology. We have vast experience in the cosmetic and aesthetic field and also as owners of our own successful skin and beauty clinic we believe we understand the needs of other business owners in today's competitive marketplace.

Our hands-on experience enables us to offer our current portfolio with total confidence and the knowledge that they have been tried and tested producing REAL results.

POLLOGEN

POLLOGEN is the developer and manufacturer of five revolutionary technologies under the industry premier brand names: OxyGeneo™, Hybrid Energy™, TriPollar®, TriLipo® and TriFractional™. We offer a full line of clinically-proven, safe and effective, non-invasive anti-aging facial and body contouring treatment platforms for a wide range of aesthetic applications. POLLOGEN provides solutions for professionals in over 60 countries, addressing the specific needs and dynamic changes unique to the ever-evolving aesthetic industry.

We believe in constantly challenging ourselves to create the most advanced, effective medical aesthetic technologies and solutions. In everything we do, we take a customer-centric approach by making our products user-friendly, safe and convenient. At POLLOGEN there is no such word as "done"; we continually perfect our solutions to provide treatments that are pleasant and effective. We believe in finding ways to develop technologies that work with the body's natural mechanisms so beautiful results are generated from within.
